PROFESSIONAL SUMMARY

Java Full Stack Developer with 1+ year of professional experience building and maintaining scalable applications using Java, Spring Boot, Spring Security, Spring Cloud, Microservices, REST APIs, and AWS. Experienced in developing cloud-native services, improving API performance, writing unit and integration tests, and supporting production applications. Strong foundation in database management, Git, Agile development, and software engineering best practices.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS

Frameworks & Technologies: Spring, Spring Boot, Spring Security, Spring Cloud, Hibernate, Microservices, Kafka, REST APIs

AWS & Cloud: EC2, S3, API Gateway, Lambda, SQS, SNS, CloudWatch, RDS, DynamoDB, Parameter Store, Secrets Manager, AWS Batch

Databases: MySQL, PostgreSQL, DynamoDB, NoSQL

Tools & Platforms: Git, GitHub, Linux, Postman, Maven, Docker

IDEs: IntelliJ IDEA, Eclipse, VS Code

PROFESSIONAL EXPERIENCE

Cognizant Technologies (CTS) | Jun 2025 – Present

Jr. Software Engineer

- Develop and maintain scalable microservices-based applications using Java, Spring Boot, and Spring Cloud, contributing to a 28% reduction in annual system downtime incidents.
- Integrate AWS services including S3, Lambda, API Gateway, RDS, DynamoDB, CloudWatch, Parameter Store, and Secrets Manager to support cloud-native application development.
- Improved API performance by 33% through query optimization, caching strategies, and rigorous API testing using Postman.
- Implemented 60+ unit and integration test cases using Mockito and JUnit to improve code quality, reliability, and maintainability.
- Collaborate with cross-functional Agile teams to deliver scalable software solutions within sprint timelines.
- Participate in production support, bug fixing, performance tuning, and root-cause analysis for critical applications.

Cognizant Technologies (CTS) | Feb 2025 – Jun 2025

Intern

- Developed a responsive Travel Booking System using HTML, CSS, JavaScript, and MySQL as part of a team-based internship project.
- Designed and implemented user-facing modules including login, registration, travel booking, and navigation.
- Integrated MySQL for application data storage and management and implemented client-side form handling and interactive booking workflows.
- Built responsive, user-friendly web interfaces using structured HTML, CSS, and JavaScript.
- Used GitHub for source-code management and collaborative development.

PROJECT

AMLI Tools | React, Vite, JavaScript, Firebase, Netlify Functions, GitLab API, Groq, SendGrid, Microsoft Edge Extension

- Built a personal full-stack productivity platform to streamline repetitive documentation, encryption, API testing, credential management, BSA tracking, and GitLab-related workflows followed in the Axis Max Life Insurance project.
- Developed a client-side AES-256 encryption toolkit, API Artifacts Manager, and searchable API Library with cURL validation, credential extraction, payload masking, and automated ZIP generation.
- Implemented a BSA consumer tracker with search, filtering, duplicate detection, version history, bulk editing, CSV import/export, and scheduled weekly reports.
- Built RepoScope, a Microsoft Edge extension integrating GitLab APIs to provide project, branch, commit, contributor, CI pipeline, and lines-of-code analytics in a unified dashboard.
- Designed the application with React, Firebase Firestore, Netlify serverless functions, GitLab APIs, Groq AI, SendGrid, and security controls including client-side encryption, credential masking, CORS restrictions, and SSRF protection.

Axis Max Life Insurance | Java, Spring Boot, Spring Cloud, AWS Lambda, API Gateway, SQS, SNS, DynamoDB, RDS, AWS Batch

- Developed and maintained microservices-based insurance applications using Java, Spring Boot, and Spring Cloud for policy management, customer onboarding, and claim processing.
- Integrated AWS Lambda, API Gateway, SQS, SNS, DynamoDB, RDS, and CloudWatch to build scalable and secure cloud-native solutions.
- Designed and implemented RESTful APIs for policy issuance, premium payment tracking, customer profile management, and claim-status workflows.
- Implemented asynchronous communication using AWS SQS and SNS to support reliable, event-driven processing between services.
- Participated in code reviews, bug fixing, deployment support, and Agile sprint activities while maintaining application quality and performance.

EDUCATION

Bachelor of Technology (B.Tech) | 2021 – 2025

Jaypee University of Information Technology, Solan, Himachal Pradesh

Class XII | 2020 – 2021

Govt. Model Sr. Sec. School, Shoghi, Shimla
